

CUSTOM PRODUCTION SERVICES

**PRODUCTION
SCIENCES, INC.**

MODELING SERVICES

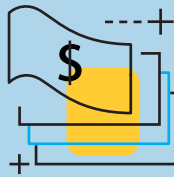

Provide us key dimensions and requirements and we can develop molds to make your parts! Utilizing SOLIDWORKS software, we can provide industry standard 2D drawings and 3D models of parts to visualize your end product.

RAPID PROTOTYPING

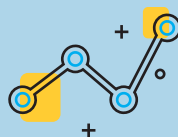

We maintain a machine shop on site to prototype molds and build tooling to rapidly create sample pieces. Prototypes will be sent to you for review before a full production run.

COST EFFECTIVE

Tooling for dip molded parts is very affordable, and can be produced quickly. That means minimal start up cost and time waiting. This also makes dip molding very scalable - for production of hundreds of pieces to millions.

PRODUCTION VALIDATION

Before production, all tooling is validated to our internal standards. We will work with you to determine if any additional testing or validation is required. We can provide you with a comprehensive validation report to support the quality of our process.

SALES
& SUPPORT

(844) DIP-MOLD

Production Sciences offers a wide range of custom dip molding services to meet our customers' needs!

- Dip molding
- Dip coating
- Plastisol casting
- Various materials
 - Multiple and custom colors
 - Various hardness (durometer) - specializing in softer materials
 - Scent and other additives
 - **Phthalate free formulations!**
- Etching of forms to mold lettering, logos, and aesthetic patterns to the internal surface.
- Cutting parts to final length or other post production processing.
